

SPECIFICATIONS – NO. 1806 Swinging Sign Kit

Stock No. 1806 is used to identify swinging sign kits which may be purchased separately for attachment to No. 1278 and No. 1804 Tire Racks – either as replacements for conventional “stand-up” signs on No. 1278, or for first-time use on No. 1804 which may have been purchased originally without a sign.

Construction: Formed ¾” OD x 18 gauge welded steel tubing, fitted with four formed steel clevises from which sign is suspended. Attachment of frame to end frame of tire rack is accomplished with four “clamshell” tee connectors.

Finish: Black baked enamel after thorough cleaning and phosphatizing.

Suspension Hardware: Stainless steel sign clips, molded nylon bearings, and stainless steel bolts with locknuts are used at the four suspension points, assuring silent, corrosion-resistant service.

Sign: 20 gauge steel, 11-1/2” x 48”, cleaned and phosphatized before finishing. Base color, screened copy, and clear top coat are all baked for durable long-lasting finish. Standard legends are “TIRE BARGAINS” and “GET OUR DEAL!” – processed in blue or bright red enamel on white base. Copy is double face.

NOTE: This sign is the same as used for numbers. 1203, 1278, and 1804.

Special copy on signs is available on firm-quantity commitment order. For requirements involving special signs, please request quotation, indicating colors, copy required, and quantity.

Packaging: Individually cartoned, KD, with illustrated assembly instruction sheet included. Shipping weight 14#. Exterior carton size: 67-1/2” x 15” x 1-1/4”. Package qualifies for shipment by United Parcel Service (at 25# weight equivalent).

Availability: Stock – no specific quantity purchase commitment required. Orders should specify choice of message and color on standard legend signs. Orders may also specify No. 1806-2 (for use with No. 1278 racks) or No. 1806-3 (for use with No. 1804 racks).
