

## SPECIFICATIONS – No. 1898 UNIVERSAL Heavy Duty Tote Jack

(Couples with all tire racks in No. 1200 & No. 1800 Series)

Width:	13-3/4"
Height:	45-3/4"
Working Height:	13-1/2" at Lift Pin; 27" at top of Handle
Construction:	One-piece all welded assembly. Handle/brace sub-assembly is 1" OD x 18 gauge welded steel tubing, undercarriage is 10 gauge brake-formed steel with welded tubular axle cover and machined steel Lift Pin. Lift Pin has machine-tapered pin portion for easy engagement, and flat bearing surface to support the mating rack's Lift Bracket without binding.
Axle:	5/8" diameter solid steel bar, zinc plated.
Wheels:	10" OD x 2.75" extra-heavy –duty rubber tires, mounted on high-impact polyolefin wheel hubs fitted with pre-greased sealed ball bearings.
Finish:	Gloss black exterior baked enamel finish, applied after thorough washing and phosphate coating.
Packaging:	Jack Assembly, Wheels, Axle, and wheel-retaining Axle Caps all packed in same carton. Shipping weight is 23#. Carton size is 43-1/4" x 11-3/4" x 7-3/4", and package qualifies for shipment by United Parcel Service.
